Royal Fitness Club · Sector 93, Noida

16+ YEARS

What's inside your plan

1. **Body analysis**
   BMI, body fat %, lean mass, waist risk
2. **Your daily numbers**
   calories, protein, carbs, fat, fibre, water
3. **7-day Indian diet chart**
   veg / egg / non-veg, your regional food
4. **Easy measures**
   katori, roti & spoon — no weighing scale needed
5. **Macros for every meal**
   calories, protein, carbs & fat per meal
6. **Workout plan**
   gym or home, matched to your diet
7. **Pre- & post-workout meals**
   plus daily steps & cardio
8. **Herbs & supplements**
   for your health condition, with safe dosage
9. **12-week roadmap**
   your expected weight, week by week
10. **Grocery list & habit tracker**
    everything you need for the week

This sample was made for an example client: woman, 30, 160 cm, 70 kg → 60 kg goal, vegetarian, PCOS. Some sections are locked. Your own plan is calculated from your measurements, food habits and health.

Client profile

Age / sex	30 y · Female	**Goal**	Fat loss · 0.5 %/week
Height / weight	160 cm · 70 kg	**Target weight**	60 kg
Diet	Veg	**Style**	Balanced
Activity	Moderate — 3–5 sessions/week	**Training**	4 days/week (gym)
Meals/day	5	**Allergies**	None reported
Health	PCOS / PCOD	**Workout time**	6:00 pm

3D body map from tape measurements

Body analysis

Measure	Result	Meaning
BMI	27.3	Obese (class I) (Asian cut-offs)
Healthy weight	47.4–58.6 kg	BMI 18.5 to 22.9
Body fat	37.1 %	Obese range · US Navy tape method
Fat / lean mass	26 kg / 44 kg	Lean = everything that is not fat
FFMI	17.2 (norm. 18.4)	Lean mass per height²
Waist ÷ height	0.54	Increased risk
Waist ÷ hip	0.84	Lower risk
Waist	86 cm	Abdominal obesity (Asian cut-off)

Daily targets

CALORIES	PROTEIN	CARBS	FAT	FIBRE	WATER
1,770 kcal/day	128 g 2 g/kg	204 g 46 % energy	49 g 25 % energy	25 g 14 g / 1000 kcal	1.6–2.1 L drinks, rest–training

Energy: BMR 1,389 kcal (Mifflin-St Jeor) × activity 1.55 = maintenance 2,153 kcal. Deficit of 383 kcal/day ~ 0.35 kg per week. Target weight in about 29 weeks at this rate (real progress slows as weight changes; we re-check every 2 weeks).

A note from Coach Aman Sharma

Month 1 focus: protein at every meal, 8,000+ steps daily, no sugary drinks, and sleep by 11 pm. Send me your weight and waist every 2 weeks — we adjust the plan together.

SAMPLE PREVIEW

Your week at a glance

Daily herbs — On waking: methi · With breakfast: dalchini · Morning and evening: pudina (doses and cautions on the Guidance page)
On waking (6:30 am): 1-2 glasses of water. Each meal ends with its calories and P/C/F (protein, carbs, fat in g). Measures: 1 katori (bowl) = 150 ml · 1 glass = 200 ml · 1 tsp = 5 g oil / ghee · 1 tbsp = about 10 g dry · 1 phulka = 30 g atta · 1 millet roti / bhakri = 35 g flour · 1 katori cooked dal = 30 g raw dal · 1 katori cooked rice = 55 g raw rice · 1 katori sabzi = 150 g raw vegetables. Grains and dals weighed raw.

Day	Breakfast 8:00 am	Mid-morning 11:00 am	Lunch 1:30 pm	Evening 5:00 pm	Dinner 8:00 pm	Day total target 1,770 kcal
Day 1 **Workout**	Moong-rava chilla with hung-curd dip • 1½ katori hung curd / Greek yogurt • 1 katori cooked suji / semolina • 2 tsp mustard oil • 1½ katori cooked moong dal • ½ medium tomato tomato • ½ medium onion onion = 447 kcal · P 34 · C 53 · F 11 g	Soya-chunk chaat with fruit • 1 katori cooked soya chunks • 1 orange orange • ½ medium tomato tomato • ½ medium onion onion • 1 tsp mustard oil = 179 kcal · P 14 · C 21 · F 5 g	Black rajma & barley bowl • 6 matchbox-size pieces tofu • 1½ katori cooked barley / jau • 1 katori cooked rajma • a handful lettuce • a handful capsicum • ½ cucumber cucumber = 528 kcal · P 39 · C 63 · F 14 g	Paneer cubes with seasonal fruit • 3 matchbox-size pieces paneer • 2 chikoos chikoo / sapota = 300 kcal · P 15 · C 29 · F 13 g	Snake gourd kootu with rice • 1 katori hung curd / Greek yogurt • ½ katori cooked rice • ½ tsp coconut oil • 1 katori snake gourd / chichinda • 1 katori cooked moong dal • 2 tbsp coconut = 346 kcal · P 26 · C 39 · F 9 g	**1,799 kcal** **P 129 · C 206 g** **F 51 · fibre 59 g**

Medical & safety notes

Note	PCOS: 5–10 % weight loss improves cycles and insulin resistance (International PCOS Guideline 2023). Low-GI carbs and regular strength training help.

Herbs & supplements for your health

These support your treatment — they do not cure a disease or replace any medicine. Never stop or change a prescribed medicine on your own. Tell your doctor before starting any herbal supplement if you take medicines (especially for diabetes, blood pressure, thyroid or blood thinning).

Herb / supplement	When & how to take	Why it may help	Caution
Methi (fenugreek) seeds **Kitchen herb**	On waking: Soak 1–2 tsp (5–10 g) seeds overnight in a glass of water; drink the water and chew the seeds in the morning, 20–30 min before breakfast.	May lower fasting sugar and HbA1c a little in type 2 diabetes. Source: Neelakantan et al., Nutr J 2014 (meta-analysis)	Can add to the effect of diabetes medicines — check sugar for low readings. Avoid in pregnancy. May cause gas; skip with chickpea or peanut allergy.
Dalchini (Ceylon cinnamon) **Kitchen herb**	With breakfast: ½–1 tsp (1–3 g) ground Ceylon cinnamon a day in oats, curd or tea. Not more than 1 tsp.	Small, inconsistent fall in fasting sugar in trials; a flavour that replaces sugar. Source: Allen et al., Ann Fam Med 2013 (meta-analysis); EFSA coumarin opinion 2008	Buy Ceylon (true) cinnamon: common cassia contains coumarin, which can harm the liver in large amounts.

Your 12-week roadmap

Expected at -0.35 kg per week from your calories. Real progress is not a straight line: water and food weight move the scale day to day, and loss slows as weight drops — your coach adjusts the plan at each check-in.

Check-in log — every 2 weeks

Check-in	Weight	Waist	Hip	Avg steps	Energy 1–5	Coach's notes
Today	70 kg	86 cm	102 cm			
Week 2						
Week 4						
Week 6						
Week 8						
Week 10						
Week 12						

Measure first thing in the morning, after the toilet and before food. Take front, side and back photos in the same light every 4 weeks.
